CRITICAL SURFACE TREATMENTS WHERE DEMANDS FOR QUALITY

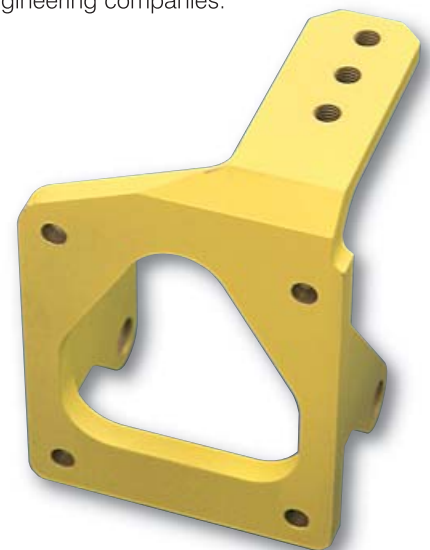

GEB Surface Treatments Ltd. offers a specialised and in-depth capability across a carefully selected range of critical metal surface treatments. These match the requirements of customers in the civil and military aerospace market and other sectors that have similar demands for quality and performance. By the use of a balanced mix of manual and automatic processing, GEB achieves excellent service, on-time delivery and total customer satisfaction. Processes and facilities are matched to requirements for quantities ranging from small batches to continuous batch treatment of complex components.

As a specialist in a structured and complementary range of finishes, GEB provides a comprehensive base of knowledge and experience. This fully meets customers' requirements for

electroplating, non-destructive testing, painting, dry film lubrication and part marking to the most demanding of aerospace or equivalent specifications.

Established jointly in 2005 by the Nasmyth Group (specialists in the field of precision mechanical engineering) and GE Treatments Ltd. (a world class supplier of a comprehensive range of metal surface treatments), GEB has the skills and resources to satisfy demanding requirements at cost effective prices. GEB's modern operations are supported by in-house chemical and non-destructive test facilities and this total capability enables GEB to respond quickly and fully to customer requests.

GEB is the metal surface treatment partner of choice for leading precision engineering companies.

ITY AND PERFORMANCE ARE PARAMOUNT

Processes

- Alocrom 1200
- Anodic Flaw Detect
- Chromating of Magnesium Alloys
- Chromic Acid Anodising
- Fluorescent Penetrant
- Ink Identing
- Paint Spraying and Stoving
- Silver Plate
- Vacu-blasting

Approvals List

Quality, Process and Environmental Approvals

- AS 9100: Revision B
- BS EN ISO 9001:2000
- NADCAP: Chemical Processing & Penetrant Flaw Service

Key Customer Approvals

- AEC (GOODRICH)
- Airbus SAS
- Bombardier
- ISRAEL Aerospace Industries
- Raytheon Aircraft
- Rolls Royce

GEB Surface Treatments Ltd

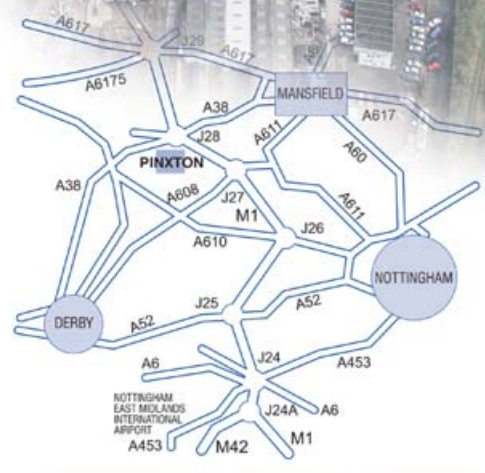

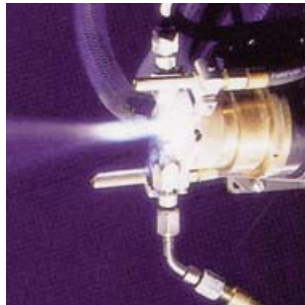

GEB Surface Treatments Ltd is jointly owned by GE Treatments Ltd, a key supplier of metal surface treatments, and Nasmyth Group Ltd; a leader in the field of precision engineering for aerospace, defence, medical and other professional markets.

GEB's new facility has increased its capacity by 75%. This investment is not only to prepare for the ramp up in its existing product, but to create capacity for immediate opportunities.

Nasmyth Group and GE Treatments Ltd

The range of surface treatments offered by GEB Surface Treatments Ltd complements the wide range of standard and specialised treatments available within the Nasmyth Group or from GE Treatments Ltd.

Nasmyth Group offers a full capability ranging from design and component manufacture, surface and metal treatments of all types, through to final product assembly.
